PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years building and modernizing enterprise web applications with Laravel, Livewire, Vue.js and MySQL/PostgreSQL, deployed on Google Cloud Platform. Led the modernization of 6 applications and the cloud migration of an 8-company corporate group, with systems used daily by 100+ internal users and 200+ external vendors. End-to-end ownership: requirements, architecture, REST APIs, development, deployment and BI reporting. Certified Scrum Master.

EDUCATION

B.S. in Computer Systems Engineering — Tecnológico de Estudios Superiores de Tianguistenco 2017 – 2022
Licensed engineer • Professional license (Cédula) 13179966

PROFESSIONAL EXPERIENCE

Software Engineer / Development Analyst — Corporativo Nova (Grupo Raloy) • Metepec, MX May 2023 – Jun 2026

- Led the modernization of 6 legacy enterprise applications to Laravel and Livewire, improving maintainability and deployment times.
- Built a multi-company Vendor Portal (document management, validation and approval) used by 200+ external vendors.
- Built a Commissions Portal with automated calculation and multi-level approval, integrated with finance and administration.
- Developed REST APIs and integrations with the corporate ERP (SCP), automating operational and administrative workflows for 8 companies.
- Designed and executed the on-premise to Google Cloud Platform migration (Cloud SQL, Filestore, virtual machines, SSL certificates) for critical applications.
- Built executive dashboards in Power BI and Looker Studio used by leadership for decision-making.
- Gathered requirements with operations, administration and finance teams across 8 companies; tracked projects in Jira Service Management.

Development Analyst / Software Engineer — Empresa Virtual (EV) May 2022 – Mar 2023

- Built custom web applications with Laravel, JavaScript and MySQL for external clients.
- Analyzed requirements, defined scope and designed SQL databases; worked in Scrum and provided user training and support.

Developer (institutional projects) — TES de Tianguistenco 2020 – 2022

- Faculty management web system with reporting (PHP, JavaScript, AJAX, MySQL) and an informational Android app on cloud services.

FEATURED PROJECT

Punto Cerca — Mini ERP & point of sale with BI and AI (*personal project*) github.com/SLC-404/DJG001

Full stack Python/Django application: customers, catalog, supplier purchasing, inventory, sales and analytics. BI module with customer segmentation (K-Means, Pandas, Scikit-learn) and a natural-language ordering chatbot (LangGraph + Qwen via Ollama) with automatic inventory validation.
